Section 2. Hazards Identification

Physical state   : Liquid. (Colorless.)
Odor             : Aromatic.
OSHA/HCS status  : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Emergency overview : DANGER! POISON!

HARMFUL IF INHALED, ABSORBED THROUGH SKIN OR SWALLOWED.
CAUSES DAMAGE TO THE FOLLOWING ORGANS: KIDNEYS, LIVER, CARDIOVASCULAR SYSTEM, RESPIRATORY TRACT, SKIN, CENTRAL NERVOUS SYSTEM, EYE, LENS OR CORNEA.
FLAMMABLE LIQUID AND VAPOR.
VAPOR MAY CAUSE FLASH FIRE.
MAY CAUSE RESPIRATORY TRACT, EYE AND SKIN IRRITATION.
BREATHING HIGH VAPOR CONCENTRATIONS MAY CAUSE CYANIDE POISONING.

Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep away from heat, sparks and flame. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

Routes of entry : Dermal contact. Eye contact. Inhalation. Ingestion.

Potential acute health effects

<table>
<thead>
<tr>
<th>Eyes</th>
<th>Moderately irritating to eyes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Skin</td>
<td>Toxic in contact with skin. Moderately irritating to the skin.</td>
</tr>
<tr>
<td>Inhalation</td>
<td>Toxic by inhalation. Moderately irritating to the respiratory system.</td>
</tr>
<tr>
<td>Ingestion</td>
<td>Toxic if swallowed.</td>
</tr>
<tr>
<td>Carcinogenic effects</td>
<td>No known significant effects or critical hazards.</td>
</tr>
<tr>
<td>Mutagenic effects</td>
<td>No known significant effects or critical hazards.</td>
</tr>
<tr>
<td>Teratogenicity / Reproductive toxicity</td>
<td>No known significant effects or critical hazards.</td>
</tr>
<tr>
<td>Medical conditions</td>
<td>Repeated skin exposure can produce local skin destruction or dermatitis. Repeated or prolonged exposure to the substance can produce lung damage. Repeated or prolonged contact with spray or mist may produce chronic eye irritation and severe skin irritation. Repeated or prolonged exposure to the substance can produce target organs damage.</td>
</tr>

### Section 4. First Aid Measures

**Eye contact**: Get medical attention immediately. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses.

**Skin contact**: Get medical attention immediately. Flush contaminated skin with plenty of water. Continue to rinse for at least 10 minutes. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing or wear gloves. Wash clothing before reuse. Clean shoes thoroughly before reuse.

**Inhalation**: Get medical attention immediately. Move exposed person to fresh air. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Ingestion**: Get medical attention immediately. Wash out mouth with water. Remove dentures if any. Move exposed person to fresh air. Keep person warm and at rest. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Protection of first-aiders**: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

### Section 5. Fire Fighting Measures

**Flammability of the product**: Flammable liquid and vapor. Vapor may cause flash fire. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.

**Products of combustion**: These products are carbon oxides (CO, CO₂), nitrogen oxides (NO, NO₂ etc.).

**Extinguishing media**
- **Suitable**: Use dry chemical, CO₂, water spray (fog) or foam.
- **Not suitable**: Do not use water jet.
- **Special exposure hazards**: Not available.
- **Special protective equipment for fire-fighters**: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
- **Special remarks on fire hazards**: Dangerous fire and explosion risk. Vapor may travel a considerable distance to source of ignition and flash back.

Continued on Next Page
### Section 6. Accidental Release Measures

**Personal precautions**: Immediately contact emergency personnel. Eliminate all ignition sources. Keep unnecessary personnel away. Use suitable protective equipment. Do not touch or walk through spilled material.

**Environmental precautions**: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

**Methods for cleaning up**: If emergency personnel are unavailable, contain spilled material. For small spills, add absorbent (soil may be used in the absence of other suitable materials) and use a non-sparking or explosion-proof means to transfer material to a sealable, appropriate container for disposal. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

### Section 7. Handling and Storage

**Handling**: Do not ingest. Avoid contact with eyes, skin and clothing. Keep container closed. Use only with adequate ventilation. Avoid breathing vapor or mist. Keep away from heat, sparks and flame. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Wash thoroughly after handling.

**Storage**: Store in a segregated and approved area. Keep container in a cool, well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame).

### Section 8. Exposure Controls/Personal Protection

<table>
<thead>
<tr>
<th>Product name</th>
<th>Exposure limits</th>
</tr>
</thead>
</table>
| Acetonitrile  | ACGIH (United States, 1996).

TWA: 40 ppm  8 hour/hours. Form: All forms  
ACGIH TLV (United States, 1/2005). Skin Notes: Refers to Appendix A -- Carcinogens. 2002 Adoption.  
TWA: 20 ppm  8 hour/hours. Form: All forms  |

Consult local authorities for acceptable exposure limits.

**Engineering measures**: Use only with adequate ventilation. If user operations generate dust, fumes, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

**Personal protection**
Section 8. Exposure Controls/Personal Protection

Eyes : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.
   Recommended: splash goggles

Skin : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
   Body: Recommended: lab coat

Respiratory : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Hands : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Recommended: nitrile rubber

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Section 9. Physical and Chemical Properties

Physical state : Liquid. (Colorless.)
Flash point : Closed cup: 5.85°C (42.5°F).
Auto-ignition temperature : 524°C (975.2°F)
Flammable limits : Lower: 3% Upper: 16%
Color : Colorless.
Odor : Aromatic.
Molecular weight : 41.06 g/mole
Molecular formula : C2-H3-N
Boiling/condensation point : 81.67°C (179°F)
Melting/freezing point : -41.9°C (-43.4°F)
Critical temperature : 274.8°C (526.6°F)
Relative density : 0.787 (Water = 1)
Vapor pressure : 9.7 kPa (72.8 mm Hg) (at 20°C)
Vapor density : 1.42 (Air = 1)
Volatility : 100% (v/v)
Odor threshold : 40 ppm
Evaporation rate : 2.33 compared with Butyl acetate.
VOC : 100 (%) (Continued on Next Page)
Section 10. Stability and Reactivity

Conditions of reactivity: Highly flammable in the presence of the following materials or conditions: open flames, sparks and static discharge, heat, shocks and mechanical impacts and oxidizing materials.

Dangerous fire and explosion risk. Vapor may travel a considerable distance to source of ignition and flash back.

Highly explosive in the presence of the following materials or conditions: open flames, sparks and static discharge, heat, shocks and mechanical impacts and oxidizing materials.

Carcinogenic effects: A4 (Not classifiable for humans or animals.) by ACGIH. Causes damage to the following organs: kidneys, liver, cardiovascular system, upper respiratory tract, skin, central nervous system (CNS), eye, lens or cornea.

Chronic effects on humans: Very hazardous in case of skin contact (permeator), of ingestion, of inhalation (lung irritant).

Specfic effects:
- Carcinogenic effects: No known significant effects or critical hazards.
- Mutagenic effects: No known significant effects or critical hazards.
- Teratogenicity / Reproductive toxicity: No known significant effects or critical hazards.

Sensitization:
- Ingestion: No known significant effects or critical hazards.
- Inhalation: Moderately irritating to the respiratory system.
- Eyes: Moderately irritating to eyes.
- Skin: Moderately irritating to the skin.

Environmental precautions: No known significant effects or critical hazards.

Products of degradation: These products are carbon oxides (CO, CO₂) and water, nitrogen oxides (NO, NO₂ etc.).

Toxicity of the products of biodegradation: The products of degradation are less toxic than the product itself.

Continued on Next Page
Section 13. Disposal Considerations

Waste disposal: The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Local regulations may be more stringent than regional or national requirements.

The information presented below only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

Section 15. Regulatory Information

United States

HCS Classification: Flammable liquid
Toxic material
Irritating material
Target organ effects

U.S. Federal regulations:
- TSCA 8(b) inventory: Listed
- SARA 302/304/311/312 extremely hazardous substances: No products were found.
- SARA 302/304 emergency planning and notification: No products were found.
- SARA 302/304/311/312 hazardous chemicals: Acetonitrile
- SARA 311/312 MSDS distribution - chemical inventory - hazard identification: Acetonitrile
- Fire hazard, Immediate (acute) health hazard, Delayed (chronic) health hazard
- Clean Water Act (CWA) 307: Acetonitrile
- Clean Water Act (CWA) 311: No products were found.
- Clean Air Act (CAA) 112 accidental release prevention: No products were found.
- Clean Air Act (CAA) 112 regulated flammable substances: No products were found.
- Clean Air Act (CAA) 112 regulated toxic substances: No products were found.

Section 15. Regulatory Information

Supplier notification: Acetonitrile 75-05-8 100

SARA 313 notifications must not be detached from the MSDS and any copying and redistribution of the MSDS shall include copying and redistribution of the notice attached to copies of the MSDS subsequently redistributed.

State regulations:
- Pennsylvania RTK: Acetonitrile: (environmental hazard, generic environmental hazard)
- Massachusetts RTK: Acetonitrile
- New Jersey: Acetonitrile

Canada

WHMIS (Canada):
- Class B-2: Flammable liquid
- Class D-1A: Material causing immediate and serious toxic effects (Very toxic).
- Class D-2B: Material causing other toxic effects (Toxic).

CEPA DSL/CEPA NDSL: CEPA DSL: Acetonitrile

This product has been classified according to the hazard criteria of the CPR and the MSDS contains all the information required by the CPR.

EU regulations

Hazard symbol/symbols:

Risk phrases:
- R11- Highly flammable.
- R20/21/22- Harmful by inhalation, in contact with skin and if swallowed.
- R36- Irritating to eyes.

Safety phrases:
- S1/2- Keep locked up and out of the reach of children.
- S16- Keep away from sources of ignition - No smoking.
- S36/37- Wear suitable protective clothing and gloves.

International regulations

International lists:
- Australia (NICNAS): Acetonitrile
- China: Acetonitrile
- Germany water class: Acetonitrile
- Japan (METI): Acetonitrile
- Korea (TCCL): Acetonitrile
- Philippines (RA6969): Acetonitrile

Section 16. Other Information

Label requirements: DANGER! POISON!

HARMFUL IF INHALED, ABSORBED THROUGH SKIN OR SWALLOWED.
CAUSES DAMAGE TO THE FOLLOWING ORGANS: KIDNEYS, LIVER,
CARDIOVASCULAR SYSTEM, RESPIRATORY TRACT, SKIN, CENTRAL NERVOUS
SYSTEM, EYE, LENS OR CORNEA.
FLAMMABLE LIQUID AND VAPOR.
VAPOR MAY CAUSE FLASH FIRE.
MAY CAUSE RESPIRATORY TRACT, EYE AND SKIN IRRITATION.
BREATHING HIGH VAPOR CONCENTRATIONS MAY CAUSE CYANIDE POISONING.

National Fire Protection Association (U.S.A.):
