| Validation date       | 7/31/2006.       |
| Print date            | 7/31/2006.       |
| In case of emergency  | 800-424-9300 CHEMTREC (USA) |
|                       | 613-996-6666 CANUTEC (Canada) |
|                       | 24 Hours/Day: 7 Days/Week |

Section 2. Hazards Identification

| Physical state        | Solid. (Deliquescent crystals.) |
| Odor                  | Ammoniacal. (Slight.) |
| OSHA/HCS status       | This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). |

Emergency overview

WARNING!

CAUSES RESPIRATORY TRACT, EYE AND SKIN IRRITATION. MAY BE HARMFUL IF SWALLOWED.

Do not ingest. Avoid contact with skin and clothing. Avoid breathing dust. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

Routes of entry

Dermal contact. Eye contact. Inhalation. Ingestion.

Potential acute health effects

| Eyes                  | Irritating to eyes. |
| Skin                 | Irritating to skin. |
| Inhalation           | Irritating to respiratory system. |
| Ingestion            | Harmful if swallowed. |

Carcinogenic effects

No known significant effects or critical hazards.

Mutagenic effects

No known significant effects or critical hazards.

Teratogenicity /
Reproductive toxicity

No known significant effects or critical hazards.

Medical conditions aggravated by over-exposure

Repeated skin exposure can produce local skin destruction or dermatitis. Repeated or prolonged exposure to the substance can produce lung damage. Repeated exposure of the eyes to a low level of dust can produce eye irritation.

See toxicological information (section 11)

Section 4. First Aid Measures

Eye contact : Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention.

Skin contact : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Inhalation : Move exposed person to fresh air. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Ingestion : Wash out mouth with water. Remove dentures if any. Move exposed person to fresh air. Keep person warm and at rest. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training.

Section 5. Fire Fighting Measures

Flammability of the product : No specific hazard.

Extinguishing media

Suitable : Use an extinguishing agent suitable for the surrounding fire.

Not suitable : None known.

Special exposure hazards : Not available.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental Release Measures

Personal precautions : Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment.

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Methods for cleaning up : If emergency personnel are unavailable, vacuum or carefully scoop up spilled material and place in an appropriate container for disposal by incineration. Avoid creating dusty conditions and prevent wind dispersal.

Section 7. Handling and Storage

Handling : Do not ingest. Avoid contact with eyes, skin and clothing. Keep container closed. Use only with adequate ventilation. Avoid breathing dust. Wash thoroughly after handling.

Storage : Keep container tightly closed. Keep container in a cool, well-ventilated area.

Section 8. Exposure Controls/Personal Protection

Consult local authorities for acceptable exposure limits.

Engineering measures: Use only with adequate ventilation. If user operations generate dust, fumes, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Personal protection

Eyes: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. Recommended: safety glasses with side-shields

Skin: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Body: Recommended: lab coat

Respiratory: Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Recommended: nitrile rubber

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Section 9. Physical and Chemical Properties

Physical state: Solid. (Deliquestent crystals.)
Color: Colorless.
Odor: Ammoniacal. (Slight.)
Molecular weight: 77.1 g/mole
Molecular formula: C₂H₄-O₂.H₃-N
Melting/freezing point: 113.85°C (236.9°F)

Section 10. Stability and Reactivity

Stability and reactivity: The product is stable.
Incompatibility with various substances: Reactive or incompatible with the following materials: oxidizing materials, acids and alkalis.
Hazardous decomposition products: carbon oxides (CO, CO₂), nitrogen oxides (NO, NO₂ etc.)
Hazardous polymerization: Will not occur.

Section 11. Toxicological Information

Toxicity data
Other toxic effects on humans: Very hazardous in case of skin contact (irritant), of eye contact (irritant), of inhalation (lung irritant). Hazardous in case of ingestion.

Specific effects
Carcinogenic effects: No known significant effects or critical hazards.
Mutagenic effects: No known significant effects or critical hazards.
Section 11. Toxicological Information

Teratogenicity / Reproductive toxicity
No known significant effects or critical hazards.

Sensitization
Ingestion
No known significant effects or critical hazards.
Inhalation
Irritating to respiratory system.
Eyes
Irritating to eyes.
Skin
Irritating to skin.

Section 12. Ecological Information

Environmental precautions
No known significant effects or critical hazards.
Products of degradation
These products are carbon oxides (CO, CO₂) and water, nitrogen oxides (NO, NO₂ etc.).
Toxicity of the products of biodegradation
The products of degradation are less toxic than the product itself.

Section 13. Disposal Considerations

Waste disposal
The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Local regulations may be more stringent than regional or national requirements.

The information presented below only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

Section 15. Regulatory Information

SARA 302/304/311/312 extremely hazardous substances: No products were found.
SARA 302/304 emergency planning and notification: No products were found.
SARA 302/304/311/312 hazardous chemicals: Ammonium Acetate
SARA 311/312 MSDS distribution - chemical inventory - hazard identification:
Ammonium Acetate: Immediate (acute) health hazard
Clean Water Act (CWA) 307: No products were found.
Clean Water Act (CWA) 311: Ammonium Acetate
Clean Air Act (CAA) 112 accidental release prevention: No products were found.
Clean Air Act (CAA) 112 regulated flammable substances: No products were found.
Clean Air Act (CAA) 112 regulated toxic substances: No products were found.

SARA 313

Form R - Reporting requirements
Product name: Ammonium Acetate
CAS number: 631-61-8
Concentration: 100

Supplier notification
Product name: Ammonium Acetate
CAS number: 631-61-8
Concentration: 100

SARA 313 notifications must not be detached from the MSDS and any copying and redistribution of the MSDS shall include copying and redistribution of the notice attached to copies of the MSDS subsequently redistributed.

State regulations
Pennsylvania RTK: Ammonium Acetate: (environmental hazard, generic environmental hazard)
Massachusetts RTK: Ammonium Acetate
New Jersey: Ammonium Acetate

Canada
WHMIS (Canada): Class D-2B: Material causing other toxic effects (Toxic).
CEPA DSL/CEPA NDSL: CEPA DSL: Ammonium Acetate

This product has been classified according to the hazard criteria of the CPR and the MSDS contains all the information required by the CPR.

EU regulations
Risk phrases: This product is not classified according to EU legislation.

International regulations
International lists
Australia (NICNAS): Ammonium Acetate
China: Ammonium Acetate
Japan (METI): Ammonium Acetate
Korea (TCCL): Ammonium Acetate
Philippines (RA6969): Ammonium Acetate

Section 16. Other Information

Label requirements
CAUSES RESPIRATORY TRACT, EYE AND SKIN IRRITATION.
MAY BE HARMFUL IF SWALLOWED.
